

Ali BARRO

32 Romola Road
SE24 9AZ
London, UK
(+44) 07925505343

Professional Summary

Geologist and Geospatial Data Analyst with mineral exploration expertise and more than 15 years of experience in combined geophysics, geology, prospecting, data analysis and projects management across Africa. Proven track record in identifying exploration targets, managing databases, and facilitating joint venture opportunities. Strong background in gold and base metals exploration, GIS, and data-driven decision making.

Key Skills

- Mineral Exploration & Target Generation
- Geological Database Management
- Remote Sensing and Data Analysis
- Workflow automation
- Field Operations Management
- Team Leadership and Training
- Stakeholder & Investor Relations
- Data visualization

Professional Experience

Database Manager and Geologist – Red Rock Resources PLC, London (Jan 2021 – Present)

- Manage the geological databases across multiple international projects
- Source greenfield and brownfield potential deposits opportunities in Africa
- Collaborate with country and exploration managers to support exploration strategy
- Generate exploration targets across projects in Ivory Coast (Au), Burkina Faso (Au), Kenya (Au), DRC (Cu, Co), and Zimbabwe (Li)

Geo-environmental Consultant – STM Environmental, UK (Aug 2020 – Dec 2020)

- Conducted geo-environmental site assessments and technical reporting
- Supported GIS and data management project delivery
- Provided software support and training to clients
- Contributed to business development and client acquisition

Consultant – Investor Relations, UK (Jan 2012 – Jul 2020)

- Assessed exploration potential of mining projects across Africa
- Facilitated joint venture opportunities between landowners and international investors

Exploration Geologist – Savannah Resources, Mali (Jun 2012 – Dec 2012)

- Co-designed and supervised exploration programmes
- Managed geological databases and generated targets

- Led geophysical operations and integrated data interpretation
- Contributed to a JORC resource of 147,000 oz gold (1.7 g/t)

Project Supervisor – Nordgold, Burkina Faso (Oct 2010 – Nov 2011)

- Supervised field operations and coordinated multidisciplinary teams
- Trained junior geologists and managed exploration camps
- Produced regular technical and operational reports

Project Geologist – Golden Rim Resources, Mali (Apr 2010 – Jul 2010)

- Conducted field mapping and regolith sampling programmes
- Identified gold targets using integrated geophysical and geological data

Technician Geophysicist – SONED Afrique, Senegal (May 2009 – Feb 2010)

- Conducted electrical surveys for groundwater exploration projects

Project Geologist – ArcelorMittal, Senegal (Sep 2008 – Nov 2008)

- Logged iron ore deposits and supported exploration activities

Project Geophysicist – Sagax Afrique, West Africa (Oct 2005 – Mar 2008)

- Conducted and interpreted geophysical surveys across multiple countries
- Successfully delivered exploration projects for mining companies

Technical Skills

Software: Geosoft Oasis Montaj, MapInfo, Micromine, Datamine, QGIS, PostGIS, PostgreSQL, GeoServer, Cloud computing, Google Earth Engine, Colab, GitHub, Numpy, Pandas, FileZilla, Windows and Ubuntu

Programming

Basic knowledge of Python, SQL, HTML, CSS and JavaScript

Education

Master's Degree in Fundamental and Applied Geology – University of Ouagadougou (2005)

Baccalaureate in Natural Sciences – Ivory Coast (2000)

Driving

Full UK driving licence

Fellowship

Geological Society of London

Education

- Master's degree in Fundamental and Applied Geology (2005)
University of Ouagadougou – Burkina Faso
- Baccalaureate in Natural Sciences (2000)
Lycée Saint Jacques and Cours du Soir La Colombe – Ivory Coast

Certifications

- First Aid (Red Cross)
- Micromine (Introductory)
- Geostatistics (Introductory)
- QGIS (Theory & Practice)
- Enterprise GIS (Open-source tools)
- Open Pit Optimization (Introductory)
- Datamine Studio RM – Resource Estimation Basics
- Remote Sensing & Geospatial Analysis (Fundamentals)
- Internet Mapping (GeoServer, Postgres, OpenLayers)
- Google Earth Engine applications
- Hyperspectral Remote Sensing (Introductory)
- Machine Learning in GIS

Continuing Professional Development

SQL

Python

Automation

R Data Analysis

Artificial Intelligence

Languages

English, French, Bambara, Dyula, Seme
